

IBPS SO Prelims 2024 Memory Based Pattern

Based on 09-Nov-2024 Shift Pattern | 150 Questions | 120 Minutes

SECTION I: ENGLISH LANGUAGE (Q.1–50)

Reading Comprehension — Passage 1 (Q.1–9)

Directions (1–9): Read the following passage carefully and answer the questions given below. Certain words are highlighted to help answer some questions.

The deep ocean, often referred to as the last unexplored frontier on Earth, remains largely mysterious despite covering more than sixty percent of the planet's surface. Scientists estimate that less than twenty percent of the ocean floor has been mapped in detail, and even fewer regions have been explored by human presence. The extreme conditions that prevail in these depths — crushing pressure, complete darkness, near-freezing temperatures, and scarce nutrients — make exploration exceptionally challenging and costly. Yet the discoveries made in recent decades have repeatedly overturned long-held assumptions about the limits of life. The discovery of hydrothermal vents in the late 1970s fundamentally changed scientific thinking about life's requirements. These underwater geysers, which release superheated, mineral-rich water from the ocean floor, host entire ecosystems that derive their energy not from sunlight but from chemosynthesis — the process by which microorganisms convert chemical compounds into organic matter. Tube worms several metres in length, blind shrimp, ghostly white crabs, and countless microbial communities thrive in these environments without any dependence on solar energy. The implication is profound: life, at its most fundamental level, does not require sunlight to exist. This realisation has dramatically expanded the search for life beyond Earth. Moons such as Europa and Enceladus, both shrouded in thick ice crusts beneath which liquid water oceans are believed to exist, have become prime targets for astrobiological investigation. If life can persist without sunlight in the crushing darkness of Earth's ocean floor, it may well flourish under the ice of distant moons warmed by tidal forces rather than stellar radiation. Beyond astrobiology, deep-sea exploration has yielded discoveries of immense practical value. Novel enzymes isolated from deep-sea microorganisms have found applications in biotechnology, pharmaceuticals, and industrial processes. Deep-sea sediments preserve records of Earth's climate history stretching back millions of years, offering invaluable data for understanding contemporary climate change. Moreover, the ocean depths harbour vast deposits of polymetallic nodules — compact mineral formations rich in manganese, cobalt, nickel, and rare earth elements — that have attracted the interest of mining companies. The prospect of deep-sea mining, however, has also sparked fierce debate among scientists and conservationists who warn that large-scale extraction could irreversibly damage ecosystems that took millennia to develop and that we have barely begun to understand.

Q1. According to the passage, which of the following best describes why deep-sea exploration remains limited despite the ocean covering most of Earth's surface?

- (a) Lack of scientific interest in marine biology (b) Extreme environmental conditions making exploration costly and difficult (c) Government restrictions on underwater research (d) Absence of useful minerals in the ocean floor (e) Competition from space exploration programmes

Q2. The discovery of hydrothermal vents primarily changed scientific understanding because:

- (a) They provided evidence of volcanic activity on the ocean floor (b) They demonstrated that life can exist entirely without solar energy (c) They revealed that the ocean floor is richer in minerals than previously thought (d) They suggested that chemosynthesis is more efficient than photosynthesis (e) They showed that extreme heat destroys all life forms

Q3. Why have Europa and Enceladus become important targets in the search for extraterrestrial life?

- (a) They are the closest moons to Earth and therefore most accessible (b) They have atmospheres similar to Earth's (c) They may harbour liquid water oceans beneath their icy surfaces (d) They have been found to contain hydrothermal vents identical to those on Earth (e) They receive the most sunlight of any moons in the solar system

Q4. Which of the following is NOT mentioned in the passage as a practical benefit of deep-sea exploration?

- (a) Discovery of enzymes useful in biotechnology (b) Records of Earth's ancient climate preserved in sediments (c) Deposits of rare and valuable minerals (d) Development of new deep-sea fishing technologies (e) Applications of marine microorganisms in pharmaceuticals

Q5. What concern do scientists and conservationists raise regarding deep-sea mining?

- (a) It would make mineral prices globally unaffordable (b) It requires technology that does not yet exist (c) It could permanently damage poorly understood ecosystems (d) It would disturb hydrothermal vent systems and halt chemosynthesis (e) It has already caused measurable damage to ocean floor habitats

Q6. Which of the following can be logically inferred from the passage?

- (a) All extraterrestrial life must depend on chemosynthesis to survive (b) The discovery of hydrothermal vents was the most important scientific discovery of the twentieth century (c) The conditions necessary to support life may be more

varied than previously assumed (d) Deep-sea mining should be halted immediately to protect ocean ecosystems (e) Europa and Enceladus are more likely to support life than any other body in the solar system

Q7. What is the closest meaning of the word "immense" as highlighted/used in the passage?

(a) Negligible (b) Considerable (c) Fluctuating (d) Contentious (e) Marginal

Q8. What is the antonym of "scarcely" as it would be used in context of the passage?

(a) Barely (b) Rarely (c) Abundantly (d) Completely (e) Partially

Q9. Which of the following titles most appropriately captures the central theme of the passage?

(a) The Threat of Deep-Sea Mining to Marine Biodiversity (b) Hydrothermal Vents and the Origins of Life on Earth
(c) The Deep Ocean: Frontier of Discovery and Its Implications (d) Why Extraterrestrial Life May Exist on Europa and Enceladus (e) Climate History Preserved in the World's Oceans

Reading Comprehension — Passage 2 (Q.10–17)

Directions (10–17): Read the following passage carefully and answer the questions given below.

Monetary policy refers to the set of actions undertaken by a nation's central bank to control the supply of money, influence interest rates, and maintain economic stability. Central banks around the world employ a variety of instruments to achieve their mandates, which typically encompass price stability, full employment, and sustainable economic growth. The primary tools include open market operations, adjustments to the policy interest rate, and alterations to reserve requirements imposed on commercial banks. Open market operations involve the buying or selling of government securities by the central bank in the open market. When the central bank purchases securities, it injects liquidity into the banking system, thereby expanding the money supply and exerting downward pressure on short-term interest rates. Lower interest rates reduce the cost of borrowing, which in turn stimulates consumer spending and business investment. Conversely, when the central bank sells securities, it withdraws money from circulation, contracts the money supply, and puts upward pressure on interest rates — a measure typically deployed to cool an overheating economy and control inflation. The policy interest rate, often referred to as the benchmark or repo rate, is the rate at which commercial banks can borrow funds directly from the central bank. This rate serves as an anchor for the broader interest rate structure in the economy. A reduction in the policy rate cascades through the financial system, lowering lending rates charged by commercial banks to businesses and households, thereby incentivising borrowing and expenditure. An increase in the policy rate has the opposite effect, making credit more expensive and discouraging excessive borrowing. Reserve requirements stipulate the minimum proportion of deposits that commercial banks must hold in reserve rather than lend out. By raising reserve requirements, the central bank reduces the amount of money banks can create through lending, effectively tightening monetary conditions. Lowering reserve requirements has the reverse effect, releasing funds into the lending cycle and expanding credit availability. The effectiveness of monetary policy, however, is subject to various constraints and time lags. Policy changes do not immediately translate into economic outcomes; it may take months or even years for the full effects to manifest across the economy. Furthermore, monetary policy alone cannot address structural economic challenges such as supply-side bottlenecks, skills mismatches in the labour market, or fiscal imbalances. These limitations underscore the importance of coordination between monetary authorities and fiscal policymakers.

Q10. Which of the following accurately describes the primary objective of monetary policy as described in the passage?

(a) To maximise government revenue through efficient taxation (b) To control money supply, influence interest rates, and maintain economic stability (c) To regulate international trade flows and currency exchange rates (d) To ensure equal distribution of wealth across all sections of society (e) To attract foreign direct investment into domestic financial markets

Q11. According to the passage, what happens when a central bank purchases government securities in the open market?

(a) Interest rates rise and borrowing becomes more expensive (b) Money supply contracts and lending slows (c) Liquidity increases, money supply expands, and interest rates fall (d) Reserve requirements for commercial banks are automatically reduced (e) The government's fiscal deficit increases proportionately

Q12. How does the policy interest rate influence the broader economy according to the passage?

(a) It directly controls the prices of goods in consumer markets (b) It serves as an anchor for interest rates across the financial system, affecting borrowing and spending (c) It determines the exchange rate of the domestic currency against foreign currencies (d) It sets mandatory profit margins for commercial banks (e) It regulates the minimum wages that employers must pay workers

Q13. What is the effect of raising reserve requirements on commercial banks, as described in the passage?

(a) Banks can lend more freely, expanding credit in the economy (b) Banks are forced to borrow more from the central bank (c) The amount of money banks can create through lending is reduced (d) Interest rates in the interbank market decline significantly (e) Consumer confidence in the banking sector increases

Q14. Which of the following is cited in the passage as a limitation of monetary policy?

(a) Central banks lack the authority to change interest rates without government approval (b) Policy changes take time and cannot address structural economic issues alone (c) Monetary policy is only effective when fiscal policy is simultaneously contractionary (d) Open market operations are prohibited in economies with large fiscal deficits (e) Reserve requirements cannot legally exceed ten percent in most countries

Q15. What is the synonym of "mandate" as used in the passage?

(a) Prohibition (b) Objective / Directive (c) Restriction (d) Suggestion (e) Criticism

Q16. What is the antonym of "contracting" as used in context of money supply?

(a) Withdrawing (b) Tightening (c) Restricting (d) Expanding (e) Moderating

Q17. Which of the following inferences can be drawn from the passage?

(a) Monetary policy is the most powerful tool available to governments to control unemployment (b) Central banks can single-handedly ensure sustainable economic growth without fiscal support (c) Effective economic management requires coordination between monetary and fiscal authorities (d) Raising interest rates always leads to recession in an economy (e) Open market operations are more effective than changes in the policy rate

Sentence Rearrangement (Q.18–22)

Directions (18–22): Five sentences are given below, labelled (A) to (E). Rearrange them in the most logical and meaningful order to form a coherent paragraph and answer the questions that follow.

- (A) Once established, these networks can withstand disruptions far better than centralised systems that depend on a single node for their functioning.
- (B) The concept of resilience in infrastructure planning has gained renewed attention following a series of natural disasters and cyberattacks that exposed critical vulnerabilities.
- (C) Engineers and urban planners now advocate for distributed systems — electricity grids, water networks, and communication channels built around multiple redundant pathways.
- (D) A power grid, for instance, that draws electricity from diverse sources across a wide geographic region is far less likely to suffer total collapse than one relying on a single power plant.
- (E) The lesson drawn from these events is clear: critical systems must be designed not merely for efficiency under normal conditions, but for continuity under stress.

Q18. Which sentence should be the FIRST in the rearranged paragraph?

(a) A (b) B (c) C (d) D (e) E

Q19. Which sentence should be the SECOND?

(a) A (b) B (c) C (d) D (e) E

Q20. Which sentence should be the THIRD?

(a) A (b) B (c) C (d) D (e) E

Q21. Which sentence should be the FOURTH?

(a) A (b) B (c) C (d) D (e) E

Q22. Which sentence should be the LAST?

(a) A (b) B (c) C (d) D (e) E

Contextual Word Usage — Phrasal Verbs (Q.23–27)

Directions (23–27): A word/phrase is given followed by three sentences (A), (B) and (C). Identify the sentences where the word/phrase has been used in a contextually and grammatically correct manner.

Q23. CALL OFF

(A) The organisers decided to call off the annual summit due to unforeseen security concerns. (B) She called off her colleague from the corridor to discuss the quarterly results. (C) The management had no choice but to call off the merger after the regulatory body raised objections.

(a) Only A (b) Both A and C (c) Only B (d) Both B and C (e) All A, B and C

Q24. LOOK INTO

(A) The audit committee will look into the irregularities reported in the financial statements. (B) She looked into the bag to retrieve her identification documents before entering the building. (C) The investigating officer assured the public that his team would look into every lead thoroughly.

(a) Only A (b) Both A and C (c) Only B (d) Both B and C (e) All A, B and C

Q25. SET ASIDE

(A) The judge agreed to set aside the earlier verdict in light of the new evidence presented by the defence. (B) Prudent individuals set aside a portion of their monthly income for emergencies and long-term goals. (C) The engineer set aside the blueprints carefully across the table for everyone to examine.

- (a) Both A and B (b) Only C (c) Both B and C (d) Only A (e) All A, B and C

Q26. BRING ABOUT

(A) Technological innovation has the potential to bring about fundamental changes in the way societies function. (B) The courier was asked to bring about the parcel to the reception desk on the ground floor. (C) Consistent and collaborative effort is the most reliable way to bring about lasting reform in public institutions.

- (a) Both A and C (b) Only B (c) Both B and C (d) Only A (e) All A, B and C

Q27. TAKE STOCK OF — Identify the INCORRECT usage

(A) The board of directors met at the end of the quarter to take stock of the company's progress against its targets. (B) After a string of setbacks, the athlete took stock of her training regimen and made significant adjustments. (C) The pharmacist was asked to take stock of the new medicines in the refrigerator compartment.

- (a) Only A (b) Only B (c) Only C (d) Both A and B (e) All are correct usages

Sentence Correction (Q.28–32)

Directions (28–32): A sentence is given with a part in bold. The bold part may contain an error. One of the options can replace the incorrect phrase. If no replacement is needed, choose "No replacement needed".

Q28. The committee has been deliberated on the proposal for over three weeks without reaching a consensus.

- (a) is deliberating on (b) have been deliberated on (c) has deliberated with (d) was deliberated at (e) No replacement needed

Q29. Neither of the two candidates were found suitable for the senior management position by the selection panel.

- (a) was found suitable (b) have been found suitable (c) are found suitable (d) were found suitably (e) No replacement needed

Q30. The government's initiative to provide affordable housing to urban migrants have yielded impressive results in the past two years.

- (a) has yielded impressive (b) have yield impressive (c) has been yielding impressive (d) is yielding an impressive (e) No replacement needed

Q31. Despite of the heavy rains, the relief workers continued their operations deep into the night to assist flood victims.

- (a) Despite the heavy rains (b) In spite of despite (c) Although of heavy rains (d) In spite the heavy rains (e) No replacement needed

Q32. Each of the students who appeared for the preliminary examination are required to bring their admit card on the day of the interview.

- (a) is required to bring their (b) are required to bring his or her (c) is required to bring his (d) were required to bring their (e) No replacement needed

Grammatically Correct Sentences (Q.33–35)

Directions (33–35): Three sentences are given below. Identify which of the sentences are grammatically and contextually correct. If all four sentences have errors, choose "All are incorrect".

Q33. (I) The data collected by the research team suggest a strong correlation between urban air quality and respiratory disease. (II) Scarcely had the press conference begun than the minister was interrupted by a journalist. (III) The professor, along with her research associates, are presenting findings at the international conference tomorrow.

- (a) Only I (b) Only II (c) Both I and II (d) Both II and III (e) All are incorrect

Q34. (I) Had the management informed the employees earlier, the strike could have been avoided. (II) The number of applications received for the post have exceeded all previous records this year. (III) The report, which comprised of fifteen chapters, was submitted to the ministry well before the deadline.

- (a) Only I (b) Only II (c) Both I and III (d) Only III (e) All are incorrect

Q35. (I) No sooner had the announcement been made when the share prices of the company fell sharply. (II) The delegation, comprising representatives from twelve nations, arrived at the summit venue yesterday. (III) She is one of those administrators who take their responsibilities extremely seriously at all times.

- (a) Only I (b) Both II and III (c) Only III (d) Both I and II (e) All are incorrect

Double Fillers (Q.36–42)

Directions (36–42): Each sentence below has two blanks. Choose the option that correctly fills both blanks in the order given.

Q36. The sustained _____ in global temperatures over the past century has led scientists to warn of potentially _____ consequences for coastal civilisations around the world.

- (a) decline, beneficial (b) rise, catastrophic (c) fluctuation, temporary (d) drop, irreversible (e) none of these

Q37. The new policy framework, while ambitious in _____, faces significant _____ from industry stakeholders who fear it will raise their operational costs substantially.

- (a) scope, resistance (b) design, approval (c) principle, support (d) intention, harmony (e) outline, applause

Q38. The _____ of skilled labour in rural healthcare facilities remains a persistent _____ that successive governments have struggled to resolve through policy alone.

- (a) abundance, achievement (b) shortage, challenge (c) surplus, concern (d) availability, success (e) none of these

Q39. The startup's remarkable _____ from a two-person operation to a publicly listed company within five years is _____ as one of the fastest in the country's entrepreneurial history.

- (a) decline, dismissed (b) transformation, celebrated (c) collapse, recognised (d) growth, ignored (e) transition, condemned

Q40. Researchers have _____ evidence suggesting that regular physical activity not only improves cardiovascular health but also _____ the risk of developing cognitive disorders in later life.

- (a) dismissed, elevates (b) destroyed, compounds (c) compiled, reduces (d) ignored, worsens (e) collected, increases

Q41. The _____ nature of the negotiations, which spanned several months and involved numerous _____ between the two delegations, ultimately resulted in a comprehensive trade agreement.

- (a) brief, confrontations (b) protracted, exchanges (c) simple, disputes (d) swift, disagreements (e) none of these

Q42. The central bank's decision to _____ interest rates was widely _____ by financial markets, which had been anticipating such a move for several quarters.

- (a) raise, condemned (b) slash, criticised (c) reduce, welcomed (d) freeze, rejected (e) increase, mourned

Column Matching (Q.43–47)

Directions (43–47): Two columns are given, each with three phrases/sentences. Choose the option that connects phrases from Column I to Column II to form meaningful and grammatically correct sentences.

Q43. COLUMN I: (A) The regulatory body imposed heavy penalties (B) Investors remained cautious (C) The harvest was severely affected COLUMN II: (D) on the company for repeatedly violating environmental norms. (E) due to the prolonged drought that gripped the northern states. (F) amid fears that the economic slowdown would extend into the next fiscal year.

- (a) Only A–D (b) A–D and B–F and C–E (c) Only B–F and C–D (d) Only A–E and B–F (e) A–F and B–E

Q44. COLUMN I: (A) The merger between the two banking giants was finalised (B) Several employees raised objections (C) The quarterly report revealed COLUMN II: (D) a significant improvement in net profit margins compared to the previous year. (E) to the new shift allocation policy citing its impact on work-life balance. (F) after months of due diligence and regulatory approvals from multiple jurisdictions.

- (a) Only A–F (b) A–F and B–E and C–D (c) Only B–D and C–F (d) Only A–D and C–F (e) None of the combinations is correct

Q45. COLUMN I: (A) Renewable energy sources have become increasingly viable (B) The committee recommended stringent measures (C) Citizens were urged to conserve water COLUMN II: (D) as the cost of solar panels and wind turbines has fallen sharply over the past decade. (E) as reservoir levels across the region had dropped to critically low levels. (F) to curb the rising incidence of vehicular pollution in metropolitan areas.

- (a) A–D and B–F and C–E (b) Only A–E and B–D (c) Only C–F (d) A–F and C–D (e) All three pairs are incorrect

Q46. COLUMN I: (A) The pharmaceutical company launched its new drug (B) The infrastructure project was delayed (C) Scientists published their groundbreaking findings COLUMN II: (D) following an extensive three-year clinical trial that demonstrated its efficacy and safety. (E) due to disputes over land acquisition that remained unresolved for over two years. (F) in one of the most prestigious peer-reviewed journals in the field of genetic research.

- (a) A–D and B–E and C–F (b) Only B–D and A–F (c) Only A–E and C–D (d) Only C–F (e) B–F and C–E

Q47. COLUMN I: (A) The government announced a new scheme (B) The investigation revealed (C) Local residents protested COLUMN II: (D) against the construction of the industrial plant citing risks to their health and

environment. (E) to provide interest-free loans to small and medium enterprises affected by the economic downturn. (F) that funds meant for the welfare programme had been systematically diverted over several years.

- (a) A–E and B–F and C–D (b) Only A–D and B–E (c) Only B–F and C–E (d) A–F and C–E (e) None of these

Sentence Completion — Best Starter (Q.48–50)

Directions (48–50): Two sentences are given (I) and (II). A set of sentence starters (A), (B), (C) are given. Choose the starter that most effectively leads into and conveys the meaning of both sentences combined.

Q48. (I) Several financial institutions have started integrating artificial intelligence into their credit assessment processes. **(II)** This has allowed them to evaluate loan applications faster and with greater accuracy. **(A)** Since AI is fundamentally changing the way decisions are made in the financial sector... **(B)** Although traditional methods of credit assessment remain widely used by many banks... **(C)** Because AI has been completely banned in financial services globally...

- (a) Only A (b) Both A and B (c) Only B (d) Both B and C (e) Only C

Q49. (I) Urban green spaces such as parks, wetlands and tree-lined avenues have been shown to reduce ambient temperatures in cities. **(II)** Planners are increasingly incorporating such features into new residential and commercial developments. **(A)** Given the growing recognition of green spaces as a tool for combating urban heat island effects... **(B)** Although green spaces are considered a luxury rather than a necessity in most modern cities... **(C)** Since trees and parks have been found to lower property values in surrounding areas...

- (a) Both A and B (b) Only A (c) Only B (d) Both B and C (e) Only C

Q50. (I) The report highlighted the widening gap between urban and rural healthcare infrastructure across the country. **(II)** Policymakers have been urged to direct greater investment towards primary health centres in underserved areas. **(A)** As concerns mount over the unequal distribution of health resources between cities and villages... **(B)** Despite significant improvements in healthcare access in both urban and rural areas in recent years... **(C)** Since all rural areas now have access to well-equipped hospitals and specialist doctors...

- (a) Only B (b) Both B and C (c) Only A (d) Both A and B (e) Only C

SECTION II: REASONING ABILITY (Q.51–100)

Linear Seating Arrangement (Q.51–55)

Directions (51–55): Study the following information carefully and answer the questions given below.

Nine persons — A, B, C, D, E, F, G, H and I — are seated in a single row facing north. Each person works in a different department: Finance, HR, IT, Marketing, Operations, Legal, Compliance, Risk and Audit. All information is not necessarily in the given order.

F sits sixth to the right of the person who works in Compliance. Three persons sit between the Compliance person and G. G sits immediately right of the person who works in HR. The person in Legal sits fourth to the left of the person who works in HR. The person in IT sits exactly between the persons who work in Legal and D. D does not work in Audit. B sits immediately left of the person who works in Finance. As many persons sit to the right of B as to the left of the person who works in Risk. The person in Risk is an immediate neighbour of H. Two persons sit between H and E. The person immediately right of E works in Operations. C sits second to the right of the person who works in Audit. I and D are not immediate neighbours. A works in Marketing.

Q51. Who sits immediately to the left of the person who works in Operations?

- (a) E (b) The person who works in IT (c) C (d) The person who works in Compliance (e) None of these

Q52. Which of the following combinations is correct?

- (a) G — Finance (b) H — Audit (c) C — Risk (d) I — Legal (e) None of these

Q53. What is the position of the person who works in IT with respect to I?

- (a) Third to the right (b) Immediate left (c) Fourth to the left (d) Second to the right (e) Fifth to the left

Q54. Four of the following five are alike in a certain way based on their positions and form a group. Find the one that does NOT belong to the group.

- (a) The person in Compliance (b) G (c) The person in Audit (d) B (e) The person in Legal

Q55. How many persons sit between the person who works in Marketing and D?

- (a) One (b) Two (c) Three (d) Four (e) Five

Circular Seating Arrangement (Q.56–60)

Directions (56–60): Study the following information carefully and answer the questions given below.

Eight persons — P, Q, R, S, T, U, V and W — are seated around a circular table. Some face the centre and some face away from the centre. No two adjacent persons face the same direction.

P sits second to the left of T. Q sits third to the right of P. R sits immediately to the right of Q. The immediate neighbours of T face away from the centre. S sits second to the right of U. V and W are not adjacent to each other. U faces towards the centre. W sits exactly opposite to R. S faces the same direction as T.

Q56. Who among the following sits exactly opposite to P?

- (a) Q (b) V (c) S (d) U (e) W

Q57. How many persons sit between T and V, counting clockwise from V?

- (a) One (b) Two (c) Three (d) Four (e) None

Q58. Which of the following pairs face away from the centre?

- (a) P and R (b) Q and S (c) T and U (d) R and W (e) None of these

Q59. Four of the following five are alike in a certain way based on their seating arrangement. Find the odd one.

- (a) P (b) Q (c) S (d) V (e) W

Q60. Which among the following statements is/are true? I. U sits second to the left of W. II. R and S are immediate neighbours. III. V faces away from the centre.

- (a) Only I (b) Only II (c) Both I and III (d) Both II and III (e) All I, II and III

Blood Relations (Q.61–63)

Directions (61–63): Read the following information carefully and answer the questions.

M is the mother-in-law of N. K is the only son of L who is the father of M. J is the brother of N and has one daughter O. P is married to J. Q is the only child of K's sister. N is married to R who has no siblings. S and O have opposite genders. T is sister-in-law of N.

Q61. How is Q related to N?

- (a) Cousin (b) Nephew (c) Uncle (d) Brother (e) Cannot be determined

Q62. Which of the following pairs represents a married couple?

- (a) M and L (b) P and J (c) N and O (d) K and Q (e) None of these

Q63. How many generations are there in the family?

- (a) Two (b) Three (c) Four (d) Five (e) Cannot be determined

Coding-Decoding (Q.64–68)

Directions (64–68): In a certain code language, the following codes are assigned.

"Finance drives growth strongly." is coded as "mp qt rs lv"

"Growth needs proper planning." is coded as "rs bk jd xt"

"Planning and policy reform." is coded as "xt vn cw bk" (Note: only distinct word codes shown)

"Finance reform needs audit." is coded as "mp cw bk hs"

Q64. What is the code for "Finance"?

- (a) qt (b) mp (c) rs (d) lv (e) xt

Q65. If "audit" is coded as "hs", what is the code for "proper reform"?

- (a) jd cw (b) cw bk (c) jd vn (d) vn xt (e) Cannot be determined

Q66. What does "bk" stand for?

- (a) Policy (b) Reform (c) Needs (d) Planning (e) Growth

Q67. What is the possible code for "policy drives audit"?

- (a) vn qt hs (b) qt bk hs (c) mp vn jd (d) lv bk cw (e) xt mp hs

Q68. Which word is coded as "cw"?

- (a) Policy (b) Needs (c) Reform (d) Planning (e) And

Syllogism (Q.69–72)

Directions (69–72): In each question, some statements are given followed by five conclusions. You must take the statements as true even if they vary from commonly known facts. Decide which conclusion definitely follows from the given statements.

Q69. Statements: Only a few Banks are Funds. Only Funds are Schemes. Only a few Policies are Funds. Conclusions:

- (a) All Banks being Schemes is a possibility. (b) No Policy is a Bank. (c) No Bank being Scheme is a possibility. (d) All Policies being Schemes is a possibility. (e) Some Funds are not Schemes.

Q70. Statements: Some Bonds are Equities. Only a few Equities are Derivatives. All Derivatives are Commodities. Conclusions:

- (a) Some Bonds are Commodities is a possibility. (b) All Equities are Commodities. (c) No Bond is a Derivative. (d) Some Derivatives are not Equities. (e) All Bonds being Derivatives is a possibility.

Q71. Statements: Only Assets are Liabilities. Only a few Capital is Asset. No Asset is a Provision. Conclusions:

- (a) Some Capital is a Provision. (b) Some Liabilities are Assets. (c) All Capital being Provision is a possibility. (d) No Liability is a Capital. (e) All Assets being Capital is a possibility.

Q72. Statements: All Revenues are Profits. Only a few Profits are Dividends. Some Dividends are Reserves. Conclusions:

- (a) Some Reserves are Revenues. (b) All Revenues being Dividends is a possibility. (c) No Revenue is a Dividend. (d) All Dividends being Revenues is a possibility. (e) Some Profits are not Reserves.

Input-Output Machine (Q.73–77)

Directions (73–77): A word and number arrangement machine, when given an input of numbers and words, rearranges them following a specific rule. Study the illustration and apply the same rules to the given input.

Input: 40 Budget 68 Revenue 29 Fiscal 84 Deficit 36 Policy 70 Reform

Step I: Reform 40 Budget 68 Revenue 29 Fiscal 84 Deficit 36 Policy 70

Step II: Policy Reform 40 Budget 68 Revenue 29 Fiscal 84 Deficit 36 70

Step III: Fiscal Policy Reform 40 Budget 68 Revenue 29 Deficit 36 70 84

Step IV: Deficit Fiscal Policy Reform Budget 29 Revenue 36 70 84 68 40 ← [Note: rearranged per pattern]

Step V: Budget Deficit Fiscal Policy Reform 29 Revenue 36 70 84 68 40

Step VI: Revenue Budget Deficit Fiscal Policy Reform 84 70 68 40 36 29 ← Last step

Now apply the same rules to the following input:

Input: 52 Credit 78 Lending 41 Treasury 90 Bond 48 Yield 65 Swap

Q73. What is the position of "Credit" in Step VI?

- (a) Ninth from left (b) Third from the left (c) Tenth from the right (d) Second from the left (e) None of these

Q74. Which element is fifth to the right of "Lending" in Step V?

- (a) Bond (b) 41 (c) 48 (d) 90 (e) Treasury

Q75. What is the sum of the third and fifth numbers from the left end in Step III?

- (a) 130 (b) 125 (c) 118 (d) 143 (e) None of these

Q76. Which element is second to the left of the seventh element from the right end in Step II?

- (a) 52 (b) Credit (c) Lending (d) Treasury (e) None of these

Q77. Which of the following would be the last step if the input had one fewer word?

- (a) Step IV (b) Step V (c) Step III (d) Step VI (e) Cannot be determined

Inequalities (Q.78–80)

Directions (78–80): In each question, relationships between different elements are shown in the statements. Study the conclusions and select the appropriate answer.

Q78. Statements: $P < Q \leq R = S > T$; $U \geq V = W \geq R < X$ **Conclusions:** I. $S > T$ II. $U \geq R$

- (a) If only conclusion I is true (b) If only conclusion II is true (c) If either I or II is true (d) If neither I nor II follows
(e) If both conclusions I and II follow

Q79. Statements: $A > B \geq C = D \leq E$; $F \leq G > C < H = I$ **Conclusions:** I. $A > D$ II. $G > D$

- (a) If only conclusion I is true (b) If only conclusion II is true (c) If either I or II is true (d) If neither I nor II follows
(e) If both conclusions I and II follow

Q80. Fill in the blanks with appropriate symbols to make " $M > J$ " and " $K < N$ " definitely true: $M = L \geq K \underline{\hspace{1cm}} J < H \underline{\hspace{1cm}} G \underline{\hspace{1cm}} N = O > P$

- (a) $\geq, >$ (b) $>, >$ (c) $<, =$ (d) $\geq, \leq$ (e) None of these

Critical Reasoning (Q.81–85)

Directions (81–85): Read the given statements and answer the questions.

Q81. Statement: Digitalisation of banking services has dramatically increased the convenience of financial transactions for urban customers. However, a significant proportion of rural populations, particularly the elderly, continue to face difficulties accessing and using digital banking platforms. **Conclusions:** I. Digital banking has been equally beneficial for all sections of society. II. Efforts to improve digital literacy among rural and elderly populations are necessary for inclusive financial access. III. Traditional banking branches should be completely replaced by digital platforms immediately. Which of the conclusions logically follow?

- (a) Only I (b) Only II (c) Both I and III (d) Only II and III (e) All I, II and III

Q82. Statement: The adoption of electric vehicles is accelerating globally as governments introduce incentives and automotive manufacturers expand their EV portfolios. However, the widespread adoption faces hurdles including insufficient charging infrastructure in semi-urban areas and the relatively higher upfront cost compared to conventional vehicles. Which of the following, if true, would most effectively counter the challenges mentioned in the statement?

- (a) Launching a government-subsidised charging infrastructure programme and providing purchase subsidies to first-time EV buyers. (b) Mandating a complete ban on the manufacture of conventional petrol and diesel vehicles within three years. (c) Increasing fuel taxes on conventional vehicles to make EVs comparatively cheaper. (d) Restricting EV sales to metropolitan cities where infrastructure is already adequate. (e) Investing solely in public transport rather than promoting private electric vehicles.

Q83. Statement: A recent study found that employees who work entirely from home report higher individual productivity on focused tasks but lower scores on collaborative creativity metrics compared to those who follow a hybrid work model. **Assumptions:** I. Collaborative creativity is a valued component of organisational productivity. II. Hybrid work models involve some days working from the office and some from home. III. The findings apply equally to all industries and types of organisations. Which assumptions are implicit in the statement?

- (a) Only I (b) Only II (c) Both I and II (d) Only III (e) All I, II and III

Q84. Statement: The rising use of renewable energy sources such as solar and wind has substantially reduced carbon emissions in countries that have invested heavily in green energy transition. These sources are sustainable and reduce

dependence on imported fossil fuels. However, the intermittent nature of solar and wind energy poses challenges for grid stability. Inferences: I. Countries investing in renewable energy benefit from both environmental and energy security advantages. II. Renewable energy completely eliminates the need for fossil fuels in all sectors immediately. III. Grid management technologies such as battery storage are important complements to renewable energy expansion. Which of the following inferences can be drawn?

- (a) Only I (b) Only II (c) Only I and III (d) Only III (e) Only II and III

Q85. Statement: A study of 10,000 individuals over fifteen years found that those who consumed a Mediterranean diet — rich in olive oil, fish, vegetables, and whole grains — had a significantly lower incidence of cardiovascular disease than those who consumed a typical high-sugar, processed-food diet. Which of the following courses of action is most logically supported by the findings?

- (a) All processed food manufacturers should be shut down immediately to protect public health. (b) Public health campaigns should promote Mediterranean dietary patterns to reduce cardiovascular disease risk at the population level. (c) The government should legally mandate that all citizens follow a Mediterranean diet. (d) Further research should be postponed as the current findings are already conclusive. (e) Healthcare spending should be redirected entirely from treatment to dietary education.

Data Sufficiency (Q.86–88)

Directions (86–88): Each question consists of a main question and two statements (I) and (II). Decide whether the data in the statements is sufficient to answer the question. (a) Statement I alone is sufficient but Statement II alone is not. (b) Statement II alone is sufficient but Statement I alone is not. (c) Either statement alone is sufficient. (d) Both statements together are insufficient. (e) Both statements together are necessary to answer.

Q86. Seven books — A, B, C, D, E, F and G — are stacked one above another. Which book is immediately above D? Statement I: Only one book is below C. Three books are between C and G which is immediately below F. Statement II: Only two books are between B and E which is immediately above F. As many books are above B as below A.

- (a) (b) (c) (d) (e)

Q87. Six children — J, K, L, M, N and O — have different numbers of stamps. Who has the second highest number? Statement I: K has more stamps than N who has fewer than M. O has more stamps than M but fewer than K. Statement II: N has more stamps than K. Only three children have fewer stamps than K. O has more stamps than K but not more than N.

- (a) (b) (c) (d) (e)

Q88. In which direction is Point X with respect to Point Y? Statement I: Point A is 5m north of Y. Point B is 3m east of A. Point X is 4m south of B. Statement II: Point X is south-west of Point C. Point C is 5m east of Y. Point X is 4m south of a point that is 3m east of Y.

- (a) (b) (c) (d) (e)

Miscellaneous Reasoning (Q.89–100)

Q89. How many pairs of letters are in the word "ACQUAINT" that have the same number of letters between them (both forward and backward) as in the English alphabet?

- (a) One (b) Two (c) Three (d) Four (e) More than four

Q90. Find the odd one out among the following groups of letters:

- (a) BDF (b) GIL (c) MOQ (d) SUW (e) XZB

Q91. Six persons — A, B, C, D, E and F — were born in different months of a year: January, March, May, July, September and November. A was born in the month immediately before C. D was born three months after B. E was born in September. F was born before D but after C. Who was born in March?

- (a) A (b) B (c) C (d) F (e) None of these

Q92. In the word "JURISDICTION", if every consonant is replaced by its next letter in the English alphabet and every vowel is replaced by its previous letter, how many letters repeat in the new arrangement?

- (a) None (b) One (c) Two (d) Three (e) Four

Q93. If the letters in the word "COMPLIANCE" are arranged in alphabetical order, what is the position of the letter that was originally at position 7 from the left?

- (a) 3rd (b) 5th (c) 4th (d) 6th (e) 2nd

Q94. If "P is related to R" in the same way that "T is related to V" (following a positional pattern in the English alphabet), then "W is related to ___":

- (a) Y (b) Z (c) X (d) U (e) None of these

Q95. In a certain number arrangement, if the digits in "385274619" at even positions are increased by 2 and the digits at odd positions are decreased by 1, and the resulting number is arranged in descending order, what is the product of the 3rd and 5th digits from the left in the new number?

- (a) 42 (b) 35 (c) 56 (d) 48 (e) None of these

Q96. P, Q, R and S are standing at the four corners of a square park. P is to the north of R. Q is to the east of P. If S is to the south of Q, then S is in which direction with respect to R?

- (a) North-East (b) South-East (c) North-West (d) South-West (e) East

Q97. If the first, third, fifth and seventh letters of the word "PROTOCOLS" are rearranged to form a meaningful word, what is the third letter from the right end of the word formed? If more than one word can be formed, mark X; if none, mark Y.

- (a) P (b) O (c) T (d) X (e) Y

Q98. Seven persons — J, K, L, M, N, O and P — are standing in a row facing south. Statement I: Only two persons stand between J and K, neither at an end. L stands immediately left of N. As many persons stand to the left of J as to the right of L. N does not stand at an extreme end. Statement II: K stands second to the left of M. Only three persons stand between M and O, who is not at an end. Persons to the left of P number one less than those to the right of K. K and P are not adjacent. Who stands second from the left end?

- (a) Statement I alone sufficient (b) Statement II alone sufficient (c) Either statement sufficient (d) Both together insufficient (e) Both together necessary

Q99. Four of the following five are alike in a certain way and form a group. Find the one which does NOT belong to the group.

- (a) ACF (b) DFI (c) KMP (d) UVX (e) SUX

Q100. Eight persons P, Q, R, S, T, U, V and W attend a conference on different days — Monday through Saturday with two days having two persons each and the remaining four days having one person each. P attends on Monday. Q attends on the same day as S. T attends two days after R. U attends on Thursday. V and W attend on the same day. Q does not attend on Wednesday or Thursday. R attends on Tuesday. On which day does Q attend?

- (a) Monday (b) Tuesday (c) Friday (d) Saturday (e) Cannot be determined

SECTION III: QUANTITATIVE APTITUDE (Q.101–150)

Data Interpretation — Table (Q.101–105)

Directions (101–105): The following table shows the Cost Price (CP), Markup Percentage and Profit/Loss Percentage of five articles. Negative profit % denotes loss. Some values are missing; calculate where required.

Article	Cost Price (Rs)	Markup %	Profit/Loss %
P	600	75%	40%
Q	----	65%	30%
R	800	----	-15%
S	-----	55%	----
T	1500	----	-20%

Note: (i) Negative profit% = loss. (ii) Missing values are to be calculated as needed.

Q101. The ratio of the discount percentage on article P to the markup percentage on article T is 3:5. Find the difference between the discount allowed on article T and the profit earned on article P (in Rs).

- (a) 160 (b) 200 (c) 240 (d) 280 (e) 320

Q102. If the average selling price of articles R, S and T is Rs 1040 and the profit percentage of article S is one-fourth of the markup percentage of article Q, then which of the following is correct about article S?

- (a) Profit earned on S is Rs 200 (b) Discount on S is 25% (c) Both (a) and (b) (d) CP of S is more than that of T (e) Both (a) and (d)

Q103. If the discount allowed on article R is 40% and the marked price of R is 25% more than that of article Q, find the selling price of article Q (in Rs).

- (a) 720 (b) 840 (c) 960 (d) 1080 (e) 1120

Q104. The cost price of article S is 75% of the cost price of article T, and the discount on article S is 12%. If the profit percentage on S equals the markup percentage on article T, find the discount percentage on article T.

- (a) 38.5% (b) 44.4% (c) 32.8% (d) 50.0% (e) 41.67%

Q105. Which of the following statements is/are INCORRECT? I. The discount % on article P exceeds 20%. II. The difference between selling prices of R and T is more than half the selling price of P. III. The loss on article R equals two-thirds of the loss on T.

- (a) All I, II and III (b) Only I (c) Both I and II (d) Both I and III (e) Only II

Data Interpretation — Pie Charts (Q.106–110)

Directions (106–110): The pie charts below show the percentage distribution of total employees across five departments (A, B, C, D, E) in a company, and the percentage of female employees in each department. Total employees = 2400. Total female employees = 900. Use these to answer the questions.

Department-wise share of total employees: A = 20%, B = 25%, C = 18%, D = 22%, E = 15%

Department-wise share of female employees: A = 16%, B = 30%, C = 14%, D = 24%, E = 16%

Q106. What is the number of male employees in Department B?

- (a) 330 (b) 330 (c) 330 (d) 600 (e) 270

Q107. What is the ratio of total female employees in departments A and C together to total male employees in departments D and E together?

- (a) 5:8 (b) 3:7 (c) 4:9 (d) 27:74 (e) 9:23

Q108. Total female employees in Department D is what percentage of total employees in Department A?

- (a) 40% (b) 45% (c) 50% (d) 54% (e) 60%

Q109. If 20% of employees in Department E are interns and the ratio of male to female interns is 3:1, find the number of male employees in E who are NOT interns.

- (a) 195 (b) 207 (c) 180 (d) 213 (e) None of these

Q110. If the total employees in a new department F is 40% of total employees in Department C, and male employees in F are 3/5 of females in F, find the difference between male and female employees working in F.

- (a) 72 (b) 86 (c) 64 (d) 43 (e) 58

Number Series (Q.111–116)

Directions (111–113): Find the WRONG number in each series.

Q111. 28, 30, 34, 42, 58, 90, 154

(a) 30 (b) 34 (c) 42 (d) 58 (e) 90

Q112. 3, 7, 15, 31, 60, 127, 255

(a) 7 (b) 15 (c) 31 (d) 60 (e) 127

Q113. 1296, 864, 576, 384, 256, 171, 114

(a) 864 (b) 576 (c) 384 (d) 256 (e) 171

Directions (114–116): Find the MISSING number in each series.

Q114. 7, 28, 140, 840, ?, 30240

(a) 4200 (b) 5040 (c) 3360 (d) 6720 (e) None of these

Q115. 108, 216, 162, 40.5, 202.5, 33.75, ?

(a) 236.25 (b) 250.00 (c) 168.75 (d) 225.50 (e) 281.25

Q116. 11, 27, 83, 167, 503, ?

(a) 1007 (b) 895 (c) 1511 (d) 1013 (e) None of these

Approximation (Q.117–121)

Directions (117–121): Find the approximate value in place of the question mark (?).

Q117. 14.97% of $599.8 + \sqrt{(784.1)} = ?$

(a) 118 (b) 107 (c) 130 (d) 90 (e) 96

Q118. $(11.03)^3 - 5.98\%$ of $1999.9 = ?$

(a) 1213 (b) 1105 (c) 1221 (d) 1198 (e) 1240

Q119. $\sqrt{(2025.1)} + (7.97)^2 \div 1.99 = ?$

(a) 77 (b) 64 (c) 85 (d) 93 (e) 70

Q120. $(449.9 \div 14.98) \times 4.03 + 16.02\%$ of $499.9 = ?$

(a) 200 (b) 181 (c) 220 (d) 175 (e) 195

Q121. $(7.98)^2 \times 3.03 - 225.1 = ? \div 4.01$

(a) 476 (b) 556 (c) 508 (d) 620 (e) 440

Quadratic Equations (Q.122–126)

Directions (122–126): Solve the two equations and select the appropriate relationship between x and y. (a) $x > y$ (b) $x \geq y$ (c) $y > x$ (d) $y \geq x$ (e) $x = y$ or no relation can be established

Q122. I. $x^2 - 11x + 28 = 0$ II. $y^2 - 14y + 45 = 0$

(a) (b) (c) (d) (e)

Q123. I. $x^2 = 144$ II. $(y - 12)^2 = 0$

(a) (b) (c) (d) (e)

Q124. I. $x^2 - 5x - 24 = 0$ II. $y^2 - 21y + 110 = 0$

(a) (b) (c) (d) (e)

Q125. I. $3x^2 = \sqrt{729}$ II. $2y^2 - 11y + 15 = 0$

(a) (b) (c) (d) (e)

Q126. I. $x^2 - 17x + 72 = 0$ II. $y = \sqrt[3]{1331}$

(a) (b) (c) (d) (e)

Quantity Comparison (Q.127–129)

Directions (127–129): Two quantities are given. Compare them and choose the appropriate option: (a) Quantity I > Quantity II (b) Quantity I < Quantity II (c) Quantity I $\geq$ Quantity II (d) Quantity I $\leq$ Quantity II (e) Quantity I = Quantity II or no relation

Q127. Quantity I: A principal of Rs 20,000 is invested at 10% p.a. compound interest for 2 years. Find the compound interest. **Quantity II:** A principal of Rs 30,000 is invested at 8% p.a. simple interest for 2 years. Find the simple interest.

- (a) (b) (c) (d) (e)

Q128. Quantity I: A sphere of radius 9 cm is melted and recast into small cones of base radius 3 cm and height 4 cm. Find the number of cones formed. **Quantity II:** 85

- (a) (b) (c) (d) (e)

Q129. Quantity I: The average age of 12 men is 32 years. If 4 more men join and the new average becomes 30 years, find the average age of the 4 new men. **Quantity II:** The average score of 25 students in a test is 68. If the top 5 scorers average 90, find the average of the remaining 20 students.

- (a) (b) (c) (d) (e)

Word Problems (Q.130–150)

Q130. A train travelling at 90 km/h crosses a platform in 36 seconds and a pole in 18 seconds. What is the length of the platform (in metres)?

- (a) 400 (b) 450 (c) 350 (d) 500 (e) 300

Q131. A boat travels 54 km upstream in 6 hours and 72 km downstream in 4 hours. What is the speed of the current (in km/h)?

- (a) 3 (b) 4 (c) 5 (d) 6 (e) 2

Q132. The speed of Car A is 50% more than the speed of Bus B. Bus B covers X km in 5 hours and Car A covers (X + 90) km in 4 hours. If Car A increases its speed by $\frac{1}{5}$ th, find the time taken to cover (X + 150) km.

- (a) 4 hours (b) 5 hours (c) 3.5 hours (d) 4.5 hours (e) 6 hours

Q133. The side of a cube is 6 cm more than the side of a square. If the area of the square is $\frac{1}{4}$ th of the lateral surface area of the cube, find the volume of the cube.

- (a) 1728 cm^3 (b) 8000 cm^3 (c) 13824 cm^3 (d) 2197 cm^3 (e) 3375 cm^3

Q134. The average length of 18 steel rods is 80 cm. When 3 new rods of lengths x, x + 15 and x + 30 cm are added, the average becomes 77 cm. Find the value of x.

- (a) 38 (b) 40 (c) 42 (d) 44 (e) 46

Q135. The present age of X is 50% more than that of Y, and the present age of Z is 4 years more than that of Y. If the difference between the ages of X and Z after 5 years is 8 years, find the present age of X.

- (a) 30 (b) 36 (c) 24 (d) 42 (e) 18

Q136. The ratio of income of A to B is 3:4 and the ratio of their expenditures is 2:3. If the income of B increases by 25% and expenditure remains the same, B's savings become Rs 15,000. If A's savings are Rs 4,500, find the income of A.

- (a) Rs 9,000 (b) Rs 12,000 (c) Rs 13,500 (d) Rs 10,500 (e) Rs 7,500

Q137. There are four numbers where the two smallest are in ratio 4:7. The largest number is 3 more than the second largest. The average of smallest and largest is 24. The average of five times the second smallest and four times the second largest is 119. Find the average of the four numbers.

- (a) 22 (b) 23.5 (c) 21.5 (d) 24 (e) 25

Q138. B spends 15% of monthly income on rent, 25% on groceries, and 10% of remaining on transport. If B's monthly savings are Rs 4,590, find the monthly income of B.

- (a) Rs 9,000 (b) Rs 8,000 (c) Rs 10,000 (d) Rs 7,500 (e) Rs 12,000

Q139. Vessel M contains milk and water in the ratio 7:3. After removing 15 litres of the mixture, 25 litres of a mixture from Vessel N (milk:water = 3:2) is added. If the resulting ratio of milk to water is 13:7, find the initial quantity of mixture in Vessel M.

- (a) 90 litres (b) 75 litres (c) 100 litres (d) 60 litres (e) 120 litres

Q140. X, Y and Z can complete a work in 20, 30 and 40 days respectively. They started together, but after 6 days X left. After 2 more days Y also left and Z continued alone. Find the time taken by Z to complete the remaining work.

- (a) $48/5$ days (b) 9 days (c) $60/7$ days (d) 8 days (e) None of these

Q141. A tank has two inlet pipes A and B. A fills the tank in 24 hours, B fills it in 36 hours. A drain C empties it in 18 hours. A starts first and fills for 3 hours; then B joins. After another 3 hours C also opens. In how many total hours is the tank full?

- (a) 18 hours (b) 24 hours (c) 30 hours (d) 36 hours (e) None of these

Q142. A and B invest Rs 10,000 and Rs 15,000 in a business. After 6 months, A withdraws Rs 3,000 and B adds Rs 2,000 more. If at the end of the year the profit share of A is Rs 13,000, find the total profit.

(a) Rs 38,000 (b) Rs 42,000 (c) Rs 35,000 (d) Rs 46,800 (e) Rs 40,000

Q143. C is x less than B, and A is x more than B. If $A = 1200$ and the average of A and C is 1080, find the value of x .

(a) 80 (b) 120 (c) 60 (d) 100 (e) 40

Q144. CP of an article is 25% less than its SP. The MP is 150% more than the CP, and the discount given is Rs 630. Find the markup price (in Rs).

(a) 1120 (b) 945 (c) 1050 (d) 840 (e) 1260

Q145. Rs 18,000 is invested partly at 9% p.a. SI and partly at 12% p.a. SI. After 2 years, the total interest earned is Rs 3,780. Find the amount invested at 9%.

(a) Rs 10,000 (b) Rs 12,000 (c) Rs 8,000 (d) Rs 6,000 (e) Rs 9,000

Q146. A and B start from points P and Q respectively towards each other at the same time. A's speed is 72 km/h. They meet after 2.5 hours and then A takes 3 more hours to reach Q. What is B's speed (in km/h)?

(a) 60 (b) 54 (c) 48 (d) 45 (e) 36

Q147. The CI on a sum for 2 years at 12% p.a. is Rs 1,272 more than the SI on the same sum for 3 years at the same rate. Find the principal.

(a) Rs 40,000 (b) Rs 50,000 (c) Rs 45,000 (d) Rs 60,000 (e) Rs 35,000

Q148. A container has 80 litres of milk. 20 litres is replaced by water, then 20 litres of the mixture is again replaced by water. What is the final ratio of milk to water in the container?

(a) 9:7 (b) 36:19 (c) 9:16 (d) 45:19 (e) None of these

Q149. A bag contains 6 red, 5 blue and 4 green balls. Three balls are drawn at random. What is the probability that all three are not red?

(a) $\frac{84}{91}$ (b) $\frac{21}{91}$ (c) $\frac{72}{91}$ (d) $\frac{4}{7}$ (e) $\frac{5}{7}$

Q150. The perimeter of a rectangle is 64 cm. If length is increased by 6 cm and breadth decreased by 3 cm, area decreases by 18 sq cm. Find the original dimensions.

(a) 20 cm, 12 cm (b) 22 cm, 10 cm (c) 18 cm, 14 cm (d) 24 cm, 8 cm (e) 16 cm, 16 cm
